

THE NEXT GENERATION POWERROAD LITHIUM-ION BATTERY

lasts for entire vehicle life

Since our launch of first generation Lithium-ion (LiFePO4) powersports battery several years ago, hundreds and thousands of riders have enjoyed their pleasure of fantastic riding. Leading the way in lithium-ion technology, POWERROAD never stop innovating! Our team employs cutting-edge technology and now we proudly announce the launching of our new-generation lithium-ion battery which is advancing towards 4S: stabler, safer, smarter, and stronger.

KEY BENEFITS

Extensive Cycle Life:

More than 4X longer life than lead acid battery

High-Rate Discharge:

Maximum continuous discharge current up to 70-80 C

Cold Temperature Performance

Outstanding cold crank power that outperforms other products.

Dynamic Charge Acceptance

Super-fast charging rate through high current.

Low self-discharge

Able to start the vehicle after 12 months storage.

Lighter Weight

Up to 60% lighter than comparable lead acid batteries, much more suitable for racing bike, dirt bike and Harley.

Robust Brass Terminal

Offer an enhanced electrical and mechanical performance.

Heat Resistance

230°C high temperature resistance thanks to formulated flame retardant case material by our R&D.

Waterproof Design

Silicone sealant makes excellent sealing performance.

Safety & Social Responsibility

No toxic, no acid fill, no leak risk, no heavy metals, can be installed in any direction, Environment friendly.
