

RBL Series RENESOLA LAMP

The ReneSola lamp is a perfect outdoor companion. Take the hassle out of finding batteries for torches and keep your phone charged easily when power is not available. The RBL series is available with one or two lamps and comes standard with a torch, lamp stand, remote control, solar module and mobile phone charge connectors. An intelligent battery management system ensures long life of the lithium ion battery.

RBHG Series BEACON LIGHT

The ReneSola Beacon light makes simple work of providing light when power isn't available. Three levels of lamp brightness make it a perfect bed side lamp while camping or during the event of a power outage. The RBHG series comes standard with a beacon light, lamp stand and solar module. An intelligent battery management system ensures long life of the lithium ion battery.

RML-03

CHARGING & LIGHT SYSTEM

Handy for charging devices and providing light while camping or fishing. The compact RML system comes with mobile phone connectors, USB output, 3 lights and a solar module - making it an efficient source of portable power around the camp site, on the boat or in the event of a power outage. An intelligent battery management system ensures long life of the lithium ion battery which can be charged using the solar module or by an AC charger (not included).

RMLB Series

CHARGING & LIGHT SYSTEM

The perfect power hub for camping or on the boat for the weekend. The RMLB system comes standard with mobile phone connectors, USB output, 3 lights and a solar module and is available in three different battery capacity options. An intelligent battery management system ensures long life of the lithium ion battery which can be charged using the solar module or by an AC charger (not included).

RML-10

CHARGING & LIGHT SYSTEM

Serious about your camping set up? The RML system is the largest capacity unit from the Small Storage Series and comes standard with mobile phone connectors, USB output, 4 lights and a solar module. An intelligent battery management system ensures long life of the lithium ion battery which can be charged using the solar module or by an AC charger (not included).
